PORTFOLIO

PROFILE

Full-stack developer with a Bachelor's in Computer Science (Software Engineering) and **30+ projects** across web, IoT, blockchain and AI. I build products end-to-end — React/TypeScript front ends, Spring Boot and Node.js services, Dockerized deployments — and I'm comfortable taking an idea from requirements to production. Looking for a software developer role in an innovative team.

EXPERIENCE

- Developer & Community Manager

2025 - Present

The Orange Labz · NFT & crypto gaming project

 - Built game mechanics and backend infrastructure for the **Orange Crush** tap-to-earn game and worked on its smart-contract integration.
 - Launched the **ToLZ NFT collection** on OpenSea and grew a Discord community of **1,000+ members**.
- Capstone Intern — Full-Stack Developer

04/2025 - 07/2025

STEG — Tunisian Electricity and Gas Company · Tunis

 - Built **LOGISERV**, a web platform to manage and track maintenance interventions on buildings and vehicles, from requirements to production.
 - Designed a containerized microservices architecture: **React + TypeScript, Spring Boot, PostgreSQL, Redis and Docker**.
 - Implemented **Keycloak** SSO with LDAP-based role management, automated notifications (Firebase) and reporting; deployed behind Nginx.
- Software Development Intern

08/2022 - 09/2022

Tunisie Telecom · Tunis

 - Designed and built a desktop application for HR to manage intern records: search by national ID, add, edit, archive and list.
 - Built with Lazarus (Delphi-compatible Pascal) and an embedded SQLite database — no server to install.

SELECTED PROJECTS

- ApplyTrack — full-stack job-application tracker: drag-and-drop Kanban, automatic status timeline and stats dashboard on a JWT-secured REST API with per-user data isolation; 53 automated tests in CI.

Spring Boot · React · TypeScript · PostgreSQL · Docker · [github.com/naniic137/applytrack](#)
- JobFit AI — CV vs job-ad matcher with a grounded match score, skill gaps, tailored bullets and EN/FR cover letters. Four pluggable LLM providers behind one validated schema; claims must quote the CV.

React · TypeScript · LLMs · zod · Vitest · [naniic137.github.io/jobfit-ai](#)
- Fog Chess — real-time hidden-information chess: the server enforces the rules and sends each player a filtered “fog of war” view, so hidden pieces never reach the browser.

Node.js · Socket.io · Express · chess.js · [github.com/naniic137/fog-chess](#)
- PicoPulse — Raspberry Pi Pico telemetry in the browser over USB: MicroPython firmware streaming a versioned JSON protocol to a Web Serial dashboard with live charts and device control.

MicroPython · TypeScript · Web Serial · [naniic137.github.io/picopulse](#)
- Interactive Portfolio — real-time 3D universe with custom GLSL shaders, a pixel-art rendering pass and case studies of my best projects.

TypeScript · Three.js · GSAP · Vite · [hamzabenismail.cloud-ip.cc](#)

EDUCATION

- Bachelor's Degree in Computer Science

Faculty of Sciences of Sfax — Software Engineering

2021 - 2025
- High School Diploma

Ibn Rachik Private High School

2021
