PROFILE

Full-stack developer with a Bachelor's in Computer Science (Software Engineering) and **26+ projects** across web, IoT, blockchain and AI. I build products end-to-end — React/TypeScript front ends, Spring Boot and Node.js services, Dockerized deployments — and I'm comfortable taking an idea from requirements to production. Looking for a software developer role in an innovative team.

EXPERIENCE

- Developer & Community Manager

2025 - Present

The Orange Labz · NFT & crypto gaming project

Developed and deployed smart contracts, game mechanics and backend infrastructure for the **Orange Crush** tap-to-earn game.

Launched the **ToLZ NFT collection** on OpenSea and grew a Discord community of **1,000+ members**.
- Capstone Intern — Full-Stack Developer

04/2025 - 07/2025

STEG — Tunisian Electricity and Gas Company · Tunis

Built **LOGISERV**, a web platform to manage and track maintenance interventions on buildings and vehicles, from requirements to production.

Designed a containerized microservices architecture: **React + TypeScript, Spring Boot, PostgreSQL, Redis and Docker**.

Implemented **Keycloak** SSO with LDAP-based role management, automated notifications (Firebase) and reporting; deployed behind Nginx.
- Software Development Intern

08/2022 - 09/2022

Tunisie Telecom · Tunis

Designed and built a desktop application for HR to manage intern records: search by national ID, add, edit, archive and list.

Built with Lazarus (Delphi-compatible Pascal) and an embedded SQLite database — no server to install.

SELECTED PROJECTS

- Fog Chess — real-time hidden-information chess over LAN. The server enforces full chess rules and sends each player a filtered "fog of war" view; includes a Chaos mode with fairy pieces.

Node.js · Socket.io · Express · chess.js
- Interactive Portfolio — real-time 3D universe with custom GLSL shaders, a pixel-art rendering pass and a scroll-driven camera.

TypeScript · Three.js · GSAP · Vite
- ChessCipher — steganography that hides messages in realistic chess positions using a SHA-256 mapping; Python CLI and browser app.

Python · JavaScript · SHA-256
- CustomWordleV2 — Wordle clone with 33 game modes, a puzzle creator and AES-128-GCM encrypted share links.

JavaScript · Netlify
- Chkoba — real-time multiplayer Tunisian card game with 2- and 4-player team modes.

JavaScript · Firebase Realtime Database

EDUCATION

- Bachelor's Degree in Computer Science

Faculty of Sciences of Sfax — Software Engineering

2021 - 2025
- High School Diploma

Ibn Rachik Private High School

2021
